The President's Shack

by Howard Smith,
WA9AXQ

The 2009 WIQP is now done, and the work of tabulating the scores and deciding the winners is just beginning. It seemed that 75 was the place to get Wisconsin counties. 40 was active as well, and a good place to get state multipliers. I hope

lots of you participated in the contest. I had a good time. I hope you did, too.

I had suggested that the club use a Worked All States (WAS) award as a friendly competition to encourage club members to get on the air. A committee was formed of Don, KC9ISS, Tom, K9BTQ, and myself. The contest is described in this Hamtrix. It starts now and will run until the July 14th meeting. Be sure to read the article that describes the rules and provides a couple of suggestions for keeping track of the states that are worked.

Next Club Meeting

WARAC WAS AWARD

At the last club meeting, Howard announced an upcoming club project – **Worked All States (WAS)**. Well, here are the details and it starts now!

This WARAC contest is very simple. Work and log a station in each state. When you have worked all 50, submit your log to the club. No QSL cards or other verification is needed. There are no restrictions on frequency or mode except that FM may not be used.

Your log should include the other station's call and handle, state, date, time, frequency and mode. Paper log sheets will be available at club meetings. If you want to log on a computer, a neat Excel spreadsheet is available on the club website, thanks to Don Down, KC9ISS. The

printable sheet is also available on the website.

The WARAC WAS will run for three months, from now until the club meeting on July 14. At club meetings during the contest, we will have progress reports.

Let's get on the air!

From the Minutes...

By Lynn Tamblyn, K9KR
Secretary

**Minutes of the General Meeting
March 10, 2009**

The meeting was called to order at 7:03 PM by President Howard Smith.

Minutes - the membership approved the minutes as printed in Hamtrix.

ANNOUNCEMENTS

Silent Key - Howard informed the club members that David Knaus, N9QA, had a provision in his will to contribute to our Scholarship Fund. Howard also mentioned that some cash had also been donated to the Scholarship Fund by several persons attending Dave's funeral. He then mentioned that the Board had renamed the WARAC Scholarship Fund to the WARAC David Knaus Memorial Scholarship Fund.

AES Superfest – Howard mentioned that WARAC will have a PR table at this year's event on April 3 and 4. He asked for volunteers to man the club table.

Club Badges – Tom Macon asked for interested members to sign up so he can begin the inquiry process for new club badges.

40 Meters – Dick Wood mentioned that he had just read in QST that as of March 29, broadcasters will vacate the 7100-7200 kHz portion of 40. Effective that date, amateurs will have privileges from 7000 to 7200 - - free of broadcasters from ITU Regions 1 and 3. See April 2009 QST, pages 60 and 61.

WIQP – Lynn mentioned that the Wisconsin QSO Party is happening March 15, starting at 1 PM local time, and ending at 8 PM. He asked that club members try to participate.

10M Contest – Charles Craven gave the membership the results on our internal club competition. Nine members participated. He will be doing a Hamtrix article about the winners. Certificates will be presented at our annual club dinner in the fall.

WAS Form – Tom Macon showed the membership a sample of the ARRL form to be used with the ARRL's 2009 Year of the QSO Party event, including the paste on labels denoting the states worked.

PROGRAM

Monster Quad Two – via a picture show, Dick Wood went thru his now finished project, that he called his "3 season quad." Over some 7 to 8 months, Dick added 2 more elements to his previous 2-element Gem quad. All the elements on the new 20, 17, 15, 10 Meter quad are full wave, on a boom length that is now at 13 feet. Dick originally installed the 2-element version in 1985. He bought the additional parts for the additional elements years ago, but never got around to installing them until last year. Dick said he was happy with the project results so far, although he has not had a lot of time to test it out. He now needs to point the quad directly at the station he wants to talk with, as the beam width is quite sharp.

The meeting was adjourned at 8:10 PM, followed by refreshments and eyeball QSO's.

*Respectfully submitted,
Lynn Tamblyn, K9KR*

**Minutes of the Board Meeting
March 24, 2009**

The meeting was called to order at 7:07 PM. by Chairman Howard Smith.

Board members present were: Charles Craven, George Dunco, Tom Macon, Howard Smith, Lynn Tamblyn and Dick Wood.

Scholarship Funds – Howard informed the Board that David Knaus's sister had contacted Howard, giving him one half of the collections at the funeral, on behalf of Dave. This will be added to our WARAC Dave Knaus Memorial Scholarship Fund. Howard then informed the board that he had sent in the money for the 2009 Scholarship to FAR, and that he had gotten an acknowledgement from them for the money.

Worked All States Internal Club Competition – Tom reported that the committee had met. The basic purpose of

WIQP SNIPPETS

Contributed by Lynn Tamblyn, K9KR

Lynn has been receiving a lot of feedback from this year's WIQP, both in Soapbox section of submitted logs and from separate emails. Below is a portion of an email about YACHT (Young Amateur Contest Ham Team) operating in WIQP.

Hi,

Here are some photo collages of a combined YACHT/K8DAR activity in the Wisconsin QSO party on March 15...The event was held at the K8DAR Menominee DAR Boys & Girls Club ham station in Menominee, MI. We had ten youngsters participating along with four control operators. Several parents and family members also stopped in to watch the action.

We had a nice QSO with one of our YACHT members, Cal, K0DXC, of Jackson, OH prior to the WIQP on 40 meters. Cal is a special assistant for youth in the ARRL Great Lakes division, and one of our very active young contesters worldwide.

Thanks to: Brett, Blake, Andrew, Tyler, Jacob, Anna, Abbey, Bailey, Haley and Matt for some great ham radio activity. We made contact with 45 Wisconsin counties and well over 100 QSO's. Excitement reigned high as the counties started to pile up on the computer screen, especially the new ones that count as "multipliers" and are eagerly looked forward to. Each youngster was given a ham radio cap and a certificate of participation. In addition, all enjoyed pizza, soda, and chips. Thanks to Bailey's mom who also brought in some St. Patrick's Day cookies.

The event was organized by Ed, KG8CX, and Jim, KS8O. Thanks also to Paul NS8V and Tyler KC9FKE for their support and participation.

Our next major contest activity will be on Saturday, April 18 for the Michigan QSO party. That one will be held at the super radio station of Jim, KS8O, in Wallace, MI., and will use the W8PIF callsign of the Marinette & Menominee Radio Club...Young hams and selected DAR youth will again be invited to participate.

Also, on the horizon, is a planned VE test session on June 27 at our local radio club Field Day in Menominee. We hope to gain a few new young hams at that time, including several of those who worked the Wisconsin QSO party.

Thanks again to all who participated on Sunday. It was a very enjoyable experience for Jim, Paul, and myself, and we hope, for the youth as well.

73, Ed Engleman, KG8CX

2008 WARAC 10 METER CONTEST RESULTS

by Chuck Craven, WB9PUB

Here's the results from last December's WARAC 10 Meter contest from Chuck, WB9PUB.

Our WARAC contest adds a "kicker" for the number of club members worked, which goes on top of the normal ARRL contest score.

Good work in spite of poor conditions and thanks to everyone that participated. CU next December!

N9NE/m said -

Conditions on 40 and 80 were the best I have ever experienced for this event. And where did all the out-of-state folks come from? I (and probably everybody else) was absolutely mobbed by gangs of callers. I simply did not have the luxury of time to go looking for other mobiles, and when I did, I couldn't get through THEIR crowds of callers.

K9OM/4 said -

I really like the "Out-of-State Top 10" that you had in the WIQP 2008 Results. It's mighty hard to compete in the WIQP from Florida... but I improved my antennas this year and gave it a 100% effort today and am hoping I made the Top 10 List.

K9TY/m said -

Had a great time in the QSO party this year. I hit more counties (15) and drove more miles (350)... and ended up making more QSO's (346) than ever before! Amazing how fast 7 hours of driving can seem to go! Thank God for 40 meters and for Ohio hams -- seemed like every other contact was with an Ohio guy! Now I just have to figure out how to get on 80m effectively so I can work more WI counties too.

Log Analyzer

I have been developing free software tools for contesters. I have developed two specifically designed for the WIQP. These are Log Analyzers that a fixed station or a mobile station can use to see statistics about their participation and performance in the QSO Party. These tools are based on Microsoft Excel 2003 but can be used with the Open Office product line too.

The Log Analyzer will show what counties were contacted, how many Q's on CW and how many on Phone, and which bands these contacts were made. In addition, it will show what states were logged by WI stations. Another part of the analysis has a graph, which shows the band changes made during the contest. Another page shows the call signs logged in sequential order from each county. There are nine pages of statistics.

There is a second tool exclusively for MOBILE operators. It presents information that is specific to a rover like which counties were activated, in what order, at what time, and for how long. In addition it calculates the running rate of QSO's per hour for each county, what period of "dead time" occurred between the last contact in a county and the first contact in the next county.

Field Day Planning Meeting

April 21, 7:30PM

St Mary Parish

**9520 W. Forest Home Ave
Hales Corners**

Go into the upper parking lot just west of the church. Meet by the door near the corner of the buildings - we will be meeting in a different room than in the past.

June 28-29

President's Shack
(Continued from page 1)

Field Day is coming up soon, and the first Field Day meeting will be on April 21st, at St. Mary Parish. More details are in this Hamtrix.

The April program is about antenna modeling by Tom, K9BTQ. Tom has several examples done, and is looking for a couple to do at the meeting. If you have one for him to try, bring it with you. Maybe the program will

give you an idea of how well your antenna performs.

See you at the meeting. Remember, it starts at 7:00pm!

73,
Howard Smith,
WA9AXQ

Minutes
(Continued from page 2)

this event is to help get club members on the air, which the committee suggested should be a friendly competition amongst club members. The committee decided that there will be no need to present QSL cards, as confirmations of contacts. The entrant's word will be acceptable. In that regard, they made up an entry form with a reference map on the reverse side, so persons can use it for verification. Competition will begin as soon as it is published in Hamtrix, and will run for 3 months. The committee encourages members to bring their logs to club meetings and talk about the contacts. No FM contacts will be allowed.

Audit Of Club Books – Howard indicated that he would still like to see the audit of the 2007 books completed by April at the latest.

Wisconsin QSO Party - Howard reported that he is planning to visit the club's post office box once a week. At the first visit he had picked up 27 paper logs, that he gave to Tom. Tom will be converting them to an electronic format. Lynn then mentioned that his email "in box" was swamped with electronic entries, with over 190 at present, with more coming in each day. He thinks that this year we might have more entries than usual, perhaps due to the ARRL event (Year of the State QSO Party), as well as the fact that he is seeing a lot of callsigns that did not enter before. He has begun the first stage of processing, which is to separate the entry sheets from the log

data.

AES Superfest – the Board discussed the upcoming event, April 3 and 4, as to how to cover the club PR table, what to have available for handouts on the table, and an idea of which officers will cover which day. The Board also asked any club member that is interested, please contact Howard to volunteer.

Programs - The April program will be part 2 of Tom Macon's wire antenna modeling program. Hopefully May will have a program on RF Exposure. June's program should be about Field Day. A discussion then followed about a program on Log Book of the World (LOTW), and a program on robotics, with no specific months indicated yet. Lastly, there was some comments on doing a sell or swap or gear giveaway night, possibly in the fall.

Repeater – Howard reported the repeater is still working at his QTH. Chuck then mentioned that Tom needs to change the time for the off Tuesday net on the club repeater. It should start at 7 PM and not the time now listed in Hamtrix. Howard then mentioned that John Westmayer is working toward finishing his tower installation.

The meeting was adjourned at 8:05 PM.

Respectfully submitted,
Lynn Tamblin, K9KR

.....
